

I spend 4-5 hours per day in my truck driving around Houston and it's surrounding areas. I have come to rely heavily on the traffic and weather reports that are provided on my XM radio. In addition to the traffic and weather I also enjoy the vast variety of channels offered exclusively by XM (comedy, NASCAR, and Big Band channels to name a few), most of which are commercial free. Most FM radio stations are riddled with commercials, driving people to find an alternative. Due to the fact that I pay for this service, I feel as though neither the FCC nor the NAB should be able to limit what I listen to on XM. In conclusion, I strongly urge the FCC to reject the NAB petition (04-160) and let XM continue to be uncensored.
Respectfully Submitted,

Steven McCary
